

1HP

1.5~2HP

3HP

### Main components and materials

NO.	Name	Standard material
1	Pump casing	FC200
2	Impeller	BC or FC200
3	Top cover	FC200
4	Mech. seal	CA/CE
5	Shaft	SUS410
6	Coil	COPPER
7	Bearing base	FC200
8	Motor frame	SUS304
9	Strainer	SUS304
10	Cable	VCT

● SIC/SIC dual mechanical seals are available upon request.

### Product Features:

- Cable with an epoxy resin sealed water-proof cable hood. Use deep groove C3 bearing to extend life span.
- Use dual mechanical seals which is better sealed effect and better water proof structure that can increase product life span.
- Special impeller design which increases performance and efficiency. It is suitable for high head requirement applications. It is lightweight and compact that makes it easier to use and maintenance.
- Equipped with SUS304 strainer to prevent impeller from being blocked or damaged by bigger solid particles.
- Auto float switch attached on submersible pump(1 phase, 1~2HP) is available. It can make submersible pump automatically start and stop. It will prevent dry running situation occurs.

### Applications:

- Water supply for sprinkler system of grass, garden, horticulture; Irrigation for orchard; water spray for roof cleaning; waste water treatment; drainage of basement and well underground water; car washing.

### Working conditions:

- Ambient temperature: 0~40°C.
- Liquid temperature: 0~40°C.
- Max. submergence: 10m.
- Do not use it for continuous operation.
- Do not use it for sea water or highly corrosive liquids.

### Performance Curves:

### Specifications:

Model	HP	Disch. INCH	Pole P	Phase φ	Rated Head M	Rated Flow L/MIN	Max. Head M	Max. Flow L/MIN	Solid passage MM	Dimensions			Cable length M	Weight KG
